Questions for discussion
A name and a logo do not make a BRAND!
Branding is not...

What is a brand?

A product is something that is made in a factory; a BRAND is something that is bought by a customer.

A product can be copied by a competitor; a BRAND is unique.

A product can be quickly outdated; a successful BRAND is timeless.
Brand positioning

Positioning distinguishes the brand value proposition from competitors by articulating the brand’s unique strengths. It is the underlying platform for all brand expressions, through communications, experience or the core product offer.

Effective positioning addresses:

<table>
<thead>
<tr>
<th>Definition</th>
<th>Differentiation</th>
<th>Deliverable</th>
</tr>
</thead>
<tbody>
<tr>
<td>What does the brand stand for?</td>
<td>What makes the brand special?</td>
<td>What benefit does the brand deliver to its customers?</td>
</tr>
</tbody>
</table>

Effective positioning is:

<table>
<thead>
<tr>
<th>Credible</th>
<th>Relevant</th>
<th>Unique</th>
<th>Durable</th>
<th>Inspiring</th>
</tr>
</thead>
<tbody>
<tr>
<td>People can believe it</td>
<td>People care about the promise</td>
<td>Few can believably claim it</td>
<td>It can last</td>
<td>It engages people emotionally</td>
</tr>
</tbody>
</table>
Positioning

Distinguishing “branded” from just “better”

There are several levels at which to build a brand positioning: from simply fixing the basics to building a real emotional connection with your customers.

What do your customers really care about?

- **Personalized service**
  - Relationships
  - Knowledge (local)
  - Attention
  - Teaming/partnering

- **Smart solutions**
  - Innovation/flexibility
  - Risk and investment
  - Best practices, knowledge, experience
  - Systems

- **A new leader**
  - New business model/flexibility
  - Global, broad capabilities
  - Quality

Fundamentals of brand management
Value of a strong brand

Research has demonstrated that strong brands have value for...

…the consumer
• Makes decision-making faster

…the marketer
• Supports premium pricing
• Differentiates products and services, creating competitive barriers

…the manager
• Contributes to employee morale
• Improves the ability to attract top talent
• Increases attractiveness to business partners

…the owner
• Drives shareholder value

Creating brand equity

**Brand equity** is the ability to shift the demand curve of a product or service. Shifting demand should be the goal of all branding.
Impact of a strong brand

We have seen that leading brands can drive superior market value growth in strong markets and provide downside protection in weak markets.

1Top technology brands include the technology brands in the Interbrand Top 10: Microsoft, IBM and Intel.
2Technology Index is an average of the SP500 Computer Hardware Index and the SP500 Software and Services Index.
What’s involved in building a brand?

A strong brand is the sum of all information about a product, service, or company that is conveyed through communications and experience.

Corporate social responsibility impacts

The concept of sustainability is one of many possible initiatives that may be considered in broader corporate social responsibility activities. These help drive both brand and business results in several ways.

- Strengthened brand positioning and equity
- Increased ability to attract, motivate and retain employees
- Enhanced corporate image among investors and financial analysts
- Increased sales and market share
Strengthened brand positioning and equity

Socially responsible organizations have an important effect of helping create and preserve differentiation with consumers...

Future challenge: Sustainability

Our own research in the UK highlights that climate change could become a mainstream consumer issue with reputational implications in the next several years. Long lead times for action raise the risk of leaving unprepared companies with significant value at risk.

Enhanced corporate image among investors and financial analysts

Perceptions of corporate reputation and community/culture do have an impact on shareholder value.

## Evolution of corporate social responsibility priorities

Alternatives to cash donations have continued to appear as corporate social responsibility has evolved over the past decade.

<th>Late 90’s</th>
<th>Today</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSR as donating</td>
<td>CSR as marketing</td>
<td>CSR as strategy</td>
</tr>
<tr>
<td>Generate goodwill among employees and customers through corporate contributions</td>
<td>Promote company brand by linking corporate identity with admired qualities of nonprofit</td>
<td>Use CSR as part of a holistic strategy to improve competitive position</td>
</tr>
<tr>
<td>• Mostly cash gifts to local and national charities</td>
<td>• Support is used for promotional purposes</td>
<td>• Focus on increasing demand or removing strategic obstacles</td>
</tr>
<tr>
<td>• Charities chosen through employer matching or CEO “pet” causes</td>
<td>• Greater tie to overall business goals</td>
<td>• Leverage assets and expertise, not just cash</td>
</tr>
<tr>
<td>• No focus or coherence with social or business strategy</td>
<td>• Focus on return on ‘social investment’</td>
<td>• Partner with non-profits, government, and other companies to magnify results</td>
</tr>
</tbody>
</table>

**Examples**

- Employee match program
- Donate to favorite national charity of CEO
- Donate 2% of all earnings to a charity related to the business
- Spend 2X the amount donated on national marketing campaign
- Track improvement in sales
- Company with skill shortage forms school to improve labor pool
- Partners with other nonprofits, universities and government to create national program
Total corporate contributions

This results in an expanded set of resources, as cash and non-cash contributions comprise only a fraction of overall corporate philanthropy.

<tbody>
<tr>
<td>Maintain a consistent focus</td>
<td>Strategic companies reinforce their brand building efforts by focusing on causes or areas related to their industry, line of business, or customer demographics</td>
</tr>
<tr>
<td>Leverage a unique asset</td>
<td>Analogous to their “for-profit” activities, companies have a set of unique assets they can leverage to differentiate and multiply the effects of their philanthropic efforts</td>
</tr>
<tr>
<td>Constant communication</td>
<td>Best practice companies succeed at creating a culture steeped in social responsibility, communicating that culture inside and outside the organization, and integrating multiple partners into an effective coalition</td>
</tr>
<tr>
<td>Measurement of short and long term impact</td>
<td>Measurement is the crucial feedback mechanism that allows for companies to continually learn, improve, and adapt their philanthropic programs</td>

Discussion
Questions for discussion

Is there clarity about what my brand stands for today? What are the attributes that describe its personality and convey its differentiation?

What are my company’s CSR priorities? How do these reinforce and/or support my brand attributes? Are these being communicated across all of my priority audiences (e.g., customers, employees, partners)?

What is the relative priority of sustainability among my company’s CSR activities? Where appropriate, am I extending sustainability across all of my potential touchpoints (e.g., communications, environment, employee behavior)?

Is there alignment between our CSR partners and our brand and business priorities?

How is the impact measured — to my business, to my brand, to the broader market? What mechanisms are in place to assess effectiveness and, if necessary, make modifications?
