**Certified Sustainable to the Triple Bottom Line:
 Good for the Environment, the Economy and for Social Equity**

Milliken Carpet

To achieve the SMaRT Sustainable Certification on any level products must achieve 14 prerequisite points and score a minimum of 28 out of 162 points in the following areas covering all product stages across the global supply chain:

- Safe for public health & environment
- Renewable energy & energy reduction
- Biobased or recycled materials
- Facility or company requirements
- Reclamation, sustainable reuse & end of life management
- Innovation in manufacturing

Under these areas, products are required to:

- Provide Feedstock Inventory Documentation
- Document the Input and Output of Stockholm Chemicals
- Maintain a Manufacturing Facility Energy Inventory
- Keep an Inventory of all bio-based and Recycled Content Materials
- Have EMS Environmental Policies and Targets.
- Have Social Indicator Reporting for Manufacturers (Working conditions)
- Use ISO Life Cycle Assessment process
- Have Operational Reclamation and/or Sustainable Reuse :Programs
- Have Product Performance Durability (long lasting products)

To earn the Platinum Level of Sustainability in addition to the above requirements, Milliken Carpet earned 101 points in these areas:

SMART ID	Requirement	Score	Weight	Total Points
19100-1	Safe for public health & environment	19	1	19
17000-1	Renewable energy & energy reduction	17	1	17
23000-1	Biobased or recycled materials	23	1	23
16000-1	Facility or company requirements	16	1	16
23000-2	Reclamation, Reuse & End of Life	23	1	23
30000-1	Innovation in Manufacturing	3	1	3

- 19 points: **Safe for public health & environment**
Significant gains on 9 of 12 environmental impacts
- 17 points: **Renewable energy & energy reduction**
10% renewable energy use at manufacturing facilities and 8% renewable energy by our suppliers
- 23 points: **Biobased or recycled materials**
35% of materials are recycled
- 16 points: **Facility or company requirements**
ISO-compliant LCA, EMS environmental policy and targets, social indicator reporting and adopting design for the environmental process
- 23 points: **Reclamation, Reuse & End of Life**
Extended product life and compliance with performance durability standard, as well as an operational reclamation and / or sustainable reuse program, with 35% + reuse
- 3 points: **Innovation in Manufacturing**
Use of fewer materials by % weight, producing certified sustainable products by being the leader in certified carbon-neutral products
